6 light single sash and small square attic window under the gable. Windows are set in simple frames. Trim consists of a narrow frieze band under the gable eaves.

43. (Cont'd.)

Norman Kelley & Co. quarry operated along the south shore from 1869 to 1891 when it was consolidated into the Kelley Island Lime & Transport Co. This structure was probably built between 1872-73 when a total of 16 new houses were constructed by the Calkins and Co. quarry, on the island's north side, and the N. Kelley & Co. quarry on the south side. This was done to accommodate immigrant workers brought in to provide labor for the flourishing limestone trade. Initially, the N. Kelley quarry attracted a predominantly Irish labor force. However, after 1900 the KILT Co. south quarry complex was predominantly Italian. Between 1910 and 1930 this house was occupied by the Feyedelem (See ERI-1716), and later, the Pujallil families. The buildings had cistern water and no electricity. There is some suggestion that these and similar buildings were brought over from the mainland in sections and bolted together in place. This has not been substantiated.

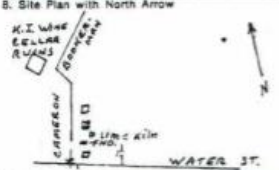

44. (Cont'd.)

company house (ERI-1716) and south of an early lime kiln (ERI-1533) and horse barn (see ER-338). The setting is now wooded and landscaped. Originally it was situated near the brink of the quarry wall where an access road passed to the north and the narrow gauge railroad grade lay along its west flank. Now access is from Cameron Rd., but continues to front to the lane running north to the home of Joseph Feyedelem (ERI-1716).

42. Further Description of Important Features (Continue on reverse if necessary) In the last several years, this home has been extensively remodeled so that none of the exterior elevations or the interior plan exhibit original treatments. It was originally used as a laborer's house by the KIL&T Co. and was somewhat similar to other KIL&T Co. properties in the area, eg., ERI-1531.		43. History and Significance This is one of a number of small houses built by the KIL&T Co. for its quarry workers in the late 1920's. It is not shown on the 1924 Insurance Engineer's map of that company's holdings. In the 1920's an immigrant family by the name of Barolak lived here. They were one of a group of foreign workers that shared a plot of land now occupied by the Post Office		
44. Description of Environment and Outbuildings Perched on the edge of excavated quarry land on 3 sides, the house sits above the road. On the south side is an access grade to the quarry floor. Being an early quarry area, the floor is now silted over and green.		45. 42. (Cont'd)

round arches above and continuous rough-faced sills below. Wider service entries are topped by segmented arches. The building is set into limestone ridges allowing a first floor service entry on the west end and an entry into the upper cellar level on the east to both be on grade. A wide opening into the lower cellar level, also at grade on the east, may have been a service entry. The cellars themselves are divided into three wine vaults per floor. The round-arched lower vaults are virtually intact while only the walls remain in the overgrown upper cellars. An arched opening and small flight of stairs connects the lower cellars with the adjacent and slightly higher cellar of Charles Carpenter's winery to the north.

43. (Cont'd.)

ufacture and storage of wine pending a larger building. An exceptionally large harvest was expected in 1871 and capital stock was increased to \$300,000 to finance the construction of a new cellar. The wine company built a boarding house on its dock to accommodate the laborers, and construction began July 5th of that year. The 30 laborers were increased to 70 by August 9th and the new building began to take shape. It was located west of the Carpenter Cellar and measured 80x129 feet on the ground. Two floors of cellars were constructed, one above and one below ground, each with three vaults for a total storage capacity of 400,000 gallons. An elegant structure was built over the cellars with a gambrel roof that created a full two stories on the gable ends, with one-and-a-half stories on the long ends. This superstructure contained the superintendent's residence, press rooms, brandy distillery, engine room, and cooper shop.

The year 1871 also inaugurated the production of champagne. Five years later the K.I. Wine Co. was awarded the diploma of highest merit and grand

medal of honor for champagnes displayed at the Philadelphia Centennial Exposition. Fire destroyed the upper stories of both cellars in 1876. There was a heavy loss with no insurance. New roofs were quickly replaced on the two buildings, but the four steeples that had capped the corner towers were never replaced. The engine room and pressing equipment were reinstalled in the former Carpenter building. By the turn of the century the winery had 15 regular employees and two travelling salesmen. A new distillery was built in 1905, a time when management of the company was still in the hands of islanders. However, by 1909 ownership was transferred to Theophile Netter. During his management the cellar burned again in 1915. The press house, distillery and engine room were consumed but the main building apparently was unharmed. The damaged facilities were restored and operations resumed under limited conditions. During Prohibition (1919-1933), Netter made grape juice and lived in the superintendent's house. On July 29, 1933, the Kelley Island Wine Company burned again, for the last time.

The impressive size and castle-like style of architecture established the Kelley Island Wine Company as a regional landmark. By the late 1880's, storage capacity had climbed to 500,000 gallons, and 1,200 to 1,500 tons of grapes were handled a season, making this winery one of the largest in the Lake Erie Islands region. The company shipped its wines all over the United States and to foreign markets in Canada, Great Britain and Germany. A list of the wines produced by the company in 1885 included: Dry Catawba, Sweet Catawba, Delaware, Elvira, Riesling, Norton's Virginia Seedling, Ives Seedling, Concord, Claret, and Port as well as two champagnes, La Rein de L'isle, and Island Queen. A 1905 list added the sweeter fortified wines: Sherry, Muscatel, and Angelica, along with Carte Blanche Champagne.

42. Further Description of Important Features (Continue on reverse if necessary) This is a draw-type kiln. It is oriented north-south with the loading grade approaching from the north and the lime shoveled out from a door in the southern face. It is square in plan view and tapers, with a step between the upper and lower chambers, from bottom to top. The "pot" is widest at the bottom to insure against choking as the mass descends. Corner blocks are hewn square while interior stones are only roughly shaped. A wrought iron turn buckle encircles the kiln.			
43. History and Significance This is the only extant draw kiln on the island and enjoys a remarkable state of preservation. It represents one of the earliest technologies used to extract a marketable product from the island's limestone resources. It is one of the few surviving elements of the first commercial quarries on the island. In 1855, Andrew Cameron was employed by the island.			
44. Description of Environment and Outbuildings The kiln is located near the working face of the early quarries. Channels for access roads are located just east of the structure. Behind (to the north) the kiln is a vast grade with limestone retaining wall constructed to provide cart access to the loading port. It is one of the few surviving elements of the first commercial quarries on the island.

42. (Cont'd)

the upper chamber. Besides the open top used for loading, there are three apertures in the kiln. At ground level, in the center of the southern face, is the unloading port. It is constructed of limestone with a rear wall of fire brick. It has deep, straight sides and is capped with a keystone arch. On the eastern and western sides are single, arched fire brick chambers (now almost totally obscured by slump from the loading grade). These fire chambers are near the bottom of the pot and constructed such that the stone was never directly above the fire but reached by the blaze drawing in from the sides.

43. (Cont'd)

George Kelley to enlarge the "Upper" quarry (see Er339 and Er340). He accomplished this by building a dock (now the Ferry dock) and laying out a road from it to the quarry (now Cameron/Bookerman Rd.). He also constructed this kiln from which lime was burned and shipped (see also ERI-1669). From this beginning, the quarry evolved through the tenure of both the Norman Kelley Co. and the Kelley Island Lime & Transport Co. (Er338). Barns and maintenance buildings of the Norman Kelley Co. were constructed nearby and company housing for the KIL&T Co. was built on the upper loading grade. It was during this later use of the area that the kiln was partially filled in (to reduce the danger of children falling in). One source indicates that this kiln was operated by A.D. Noble of Detroit in 1888; but no records of this firm have been documented, to date.

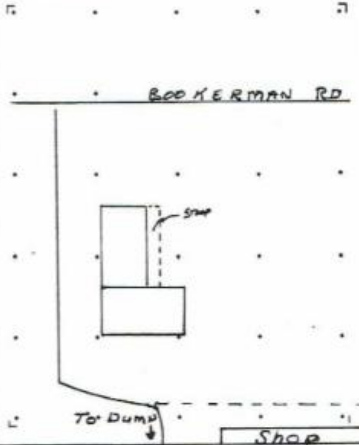

44. (Cont'd)

is on this grade that the later KIL&T Co. housing was built (see ERI-1533). The foundation of the Norman Kelley Co. draft horse barn is just southwest of the kiln. The grade used by the narrow gauge railroad of the KIL&T Co. to provide access to the coal dock runs between the kiln and Cameron/Bookerman Rd. Oral history indicates that a bridge once spanned this grade.

43. (Cont'd.)

quarry maintenance shops westward.

An historic photograph of this house suggests a house once located near the West Bay at the former end of Cameron Road. This is further supported by an oral report that indicated this house was moved from a hill north of Bookerman Rd. that once marked the island's highest ground, but was leveled by quarrying c.1913-15. The historic owner or date of construction is not known. It is known to have been occupied by the Mervo family in the 20's.

44. (Cont'd.)

shops are closed and boarded. Piles of quarry stones and miscellaneous rubble are scattered about the grounds surrounding the shops. The present house has only recently been opened after years of standing empty and neglected. Its lawn has been cleared and mowed, and restoration is in progress.

42. Further Description of Important Features (Continue on reverse if necessary) At one time there were five communicating buildings making up this maintenance complex, consisting of a 160x60' three stall locomotive house, separate car shed and adjacent machine shop-stock room-blacksmith shop with an overall 2880 sq ft. These were all of stone-faced hollow cement block, corrugated iron roof, and one-story in height. Only the machine shop and car shed are extant. North of the locomotive house was a concrete block boiler house and large		26. Local Contact Person or Organization Kevin Page: KI Hist Survey		38. Preservation Underway? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
43. History and Significance These maintenance buildings were once a part of a larger complex that came into being between 1905 and 1918 with the advent of the mechanization of the quarry process, and following the change of focus from lime making to the production of flux stone for the steel mills of the midwest. It was geared to the narrow gauge railroad and the steamshovel, both of which proliferated in this period.		27. Other Surveys in Which Included N/A		39. Endangered? By What? Neglect Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
44. Description of Environment and Outbuildings This complex lies on a broad, levelled plain, surrounded by weeds and brush that has overgrown the former quarry area. Piles of screenings lie to the west. The Village dump area is north. Two of the former six houses still can be seen along the unused road track on the southern boundary, and facing the maintenance buildings.		45. water tank. East of the access road is a 2880 sq' ft' lumber storage shed, one-story, of corrugated iron presently used by its private owner as a warehouse. All windows in the maintenance shop are now blocked with cement blocks. The former stone lug sills are still visible. The large double doored entrance to the shop is of wood plank; the entrance to the car shed on the north is closed with a metal overhead door.

43. (Cont'd.)

The Kelley Island Lime and Transport Co. first introduced the narrow-gauge railroad in 1888 when tracks were laid by the Burt Seymour Engineering Co. of Sandusky, Ohio, and the first locomotives to be used were two of the Lima pattern. There had been two earlier locomotive maintenance facilities at the North Bay. One was a small, two bay shed just south of the crusher bins. The second was similar to the West Bay locomotive house with three bays. Neither of these structures are extant. During the period 1905-1910 the lime kilns and much of the North Quarry operations were phased out. With increased operations on the south side, this large engine terminal was built at a point convenient for working the south and west quarries, and all maintenance facilities were consolidated here.

This was also a period of great expansion of the Lime Co. Production increased, and as many as 21 vessels were loaded in 4 days. 1,546,922 tons of stone were shipped on 460 boats in 1912. Along with its other production centers around the Great Lakes, the KIL&T Company was advertised as the largest business of its kind in the world.

lived on the island a relatively short time leaving soon after 1880. While here he helped manage his father's estates as a farm overseer, and was appointed Custom's Officer. The house was then purchased by Daniel Maag who had emigrated to the U.S. in 1874 from the Black Sea area of Russia, with other Germans fleeing conscription. He came to the island shortly before 1880 at the instigation of his cousin, August Schaedler (ERI-1654), working for Lewis Beatty and John Ranft in their wineries. His wife, Fredrika Youngman, whom he met in the Dakota Territory became the island midwife. C.1896 they were able to buy their own vineyards and house from Daniel Huntington, and in 1910 build a small winery to the rear of their house. This was one of the many small wineries that were in operation on the island in that period. Daniel and his wife were supporters of the German Evangelical Church and served as a trustee. A son, Elmer, born 1888, worked as a foreman for the Kelley Island Wine Co., living for a time in the superintendent's house over the east cellar, and a second son, William, born 1885, was a plant engineer for the KIL&T Co. Both brothers married daughters of August & Amelia Schnittker in Pittsburgh (See ERI-1568). A daughter, Bertha, born 1884, married quarryman Ralph Heckle. After his death in a quarry accident she lived on in the family home for many years.

44. (Cont'd.)

of the wine cellar and press house are hidden by weeds. A 16'x21' frame shed completes the outbuildings.

Point Cottage Rentals. The probable date of the moves would follow the vacating of December 1930. Muntington Road was opened by the County Surveyor in August of 1887 so the probable construction would succeed this date. The Rigis, a quarry worker's family, were known to have lived here.

OHIO HISTORIC INVENTORY

1. No. ERI-1545		4. Present Name(s) William Coleman Residence		1. No. ERI-1545
2. County ERIE		5. Other Name(s) Erastus Huntington Residence		
3. Location of Negatives O.H.S.				
6. Specific Location On the north side of Bookerman Rd., 2000' W. of its intersect/Division St.		16. Thematic Category Commerce, Mfg.		2. County ERIE
7. City or Town If Rural, Township & Vicinity Kelleys Island, Ohio		17. Date(s) or Period 1866		
8. Site Plan with North Arrow		18. Style or Design Vernacular Greek Revival

10. Site Building <input checked="" type="checkbox"/> Structure <input type="checkbox"/> Object <input type="checkbox"/>		23. Ownership Public <input type="checkbox"/> Private <input checked="" type="checkbox"/>		
11. On National Register? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		24. Owner's Name & Address, if known William & Barbara Coleman - 14916 Arden Ave. Lakewood, Ohio, 44107		
12. Is it Eligible? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		25. Open to Public? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
13. Part of Estab. Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		26. Local Contact Person or Organization Kevin Pape/K.I.Hist.Survey		
14. District Potent(?) Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		27. Other Surveys in Which Included N/A		
15. Name of Established District N/A		28. No. of Stories 1 1/2		
29. Basement? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		30. Foundation Material Coursed rubble		
31. Wall Construction Wood frame		32. Roof Type & Material Cable/asph shingle		
33. No. of Bays Front 3 Side 1		34. Wall Treatment Beveled siding		
35. Plan Shape Rectang.		36. Changes (Explain in #42) Addition <input type="checkbox"/> Altered <input type="checkbox"/> Moved <input type="checkbox"/>		
37. Condition Interior Good Exterior Good		38. Preservation Underway? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
39. Endangered? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		40. Visible from Public Road? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>		
41. Distance from and Frontage on Road 60'/60'		42. Further Description of Important Features (Continue on reverse if necessary)		
<p>A plain narrow frieze board follows beneath the overhanging eave. Second floor windows are double-hung 6/6 lights, while those on the first floor are double-hung 1/1. End boards highlight the building corners. Two early one-story shed-roofed board and batten additions are found in back. A second floor window cut into the backwall and the open front porch are other</p>				
43. History and Significance		<p>Originally, this land belonged to George C. and Emeline Huntington, but in 1861, 10.4 acres were sold to his son, Erastus, then age 22, for \$5.00. The house was built in 1866, three years after Erastus' marriage to Elzina Hamilton, daughter of James Hamilton and Sabra Titus Hamilton.</p>		
44. Description of Environment and Outbuildings		<p>The house sits in a small clearing surrounded by fairly dense woods. A wood frame outhouse and the remains of a probable limestone fruit cellar are found to the rear of the house.</p>

Census Records, Erie County Deed and Erie C. Court House Records 1874 Atlas of Erie County Barbara & William Coleman		47. Organization K.I. Planning Comm.		
		48. Date 8/85 49. Revision Date(s)		

Educated at Oberline College, Erastus was a clerk in the general store (The Lodge- ERI-1562) in 1854 until 1866 when he purchased a half interest in the business. The same year he was appointed Postmaster of Kelleys Island, a post which he held until 1884. In 1871 Erastus purchased full interest in The Lodge and his business flourished. By 1876 he had outgrown this residence and built his grand house (ERI-1707) on the south shore. Erastus sold this house to Robert R. Moysey in 1879. Robert Moysey was born in Lincolnshire, England, in 1826, and emigrated to Mansfield, Ohio in 1852. He was a leader in grape, peach, apple, quince, and small fruit growing on the island. Robert Moysey was one of the founders and Treasurer of the Sweet Valley Wine Co. (ERI-1618). His second wife, Susan Snyder, of Pennsylvania, was the island music teacher. Sometime after 1896, the KIL&T Co. owned this residence for laborers in its west quarry; it was house #82. Around 1940, the house was rented to Mathew Kennedy. Born in 1879 to parents of Irish and English birth, Matt was a cooper in the KIL&T Co. north quarry, and lived in a rented house on Huntington Lane before living in this residence after the quarry shut down.

ADDENDUM

CAMERON / BOOKERMAN ROADS

ERI-1533	KILT worker's Hse.	#43 - L3: Feyelem to read "Feyedelem"
1539	West Bay Shops	#53 - Should bear the title heading "Maintenance Shops as shown on the Sanborn Insurance Map of 1905".
1543	Palazza/D. Huntington	#43 - Reverse, L16+17: Both brothers... to read " The brothers married cousins; Elmer marrying Matilda Meier Dickman, and William marrying Minnie Schnittker, daughter of August Schnittker of Pittsburgh. See ERI-1568.
