From the desk of CORADINE.....

It is beginning to look as tho 'if we are in need of rain' we'll just go down to the "Inn" & ask Lori & Pat Hayes to plan some kind of a lawn affair & presto, we'll have it! Twice now it has happened, first at Lori & Pat's wedding when it simply poured all morning, but the sun came out long enough for the ceremony & after another downpour, let up long enough for them to have their reception on the lawn of the Inn! Then on Sunday, August 20th, there was to be a Victorian Lawn Party at the Inn & of course - it rained - really hard - till just in time for the party!

We lost another of our "Old-Timers" with the death of Godfried Schock. It was quite a surprise to us as we had not heard anything about him for quite some time. He was buried from our church - Zion United Methodist - with a simple memorial service & then interment at our Island Cemetery. The ladies of Zion prepared a luncheon & all the mourners were invited to join the family.

Maybelle & Steve Kekelik have been home for sometime now & are doing well, with Steve a little more active than Maybelle. And Martha Onders has been in real good spirits, in spite of all her hardships, with surgery on her throat & all the follow-up details. And we just heard that Ann Ludu had fallen again & had just returned from a trip to the hospital. And poor Chuck Herndon - after all his bad luck with the ladder, he did something to his hand - either burned or cut it! God be with all of you people & get well real soon! Oh, nearly forgot that Richard DeBoard had been taken to the hospital, but that is all I know.

In last month's Newsletter, I wrote about new homes we had visited this past fall

Moorings.....by Kim Bonnell

Monday mornings at the Kelleys Island library were full of fun & learning, thanks to Cindra Mielke & Lois Giles. Story time lasted 10 weeks, each week had a theme with a story, activity & a craft to take home. An average of 15 children came each week to enjoy this special time of learning & fun. Cindra & Lois did a great job & everyone is looking forward to story time next year.

The Kelleys Island branch of the Sandusky Library will begin it's winter schedule September 6. Until spring it will be open only on Wednesdays from 10:30 AM to 12:30.

No one has yet been named to the Kelley Island School Board to take the place of Henry Knapp. The county school board must appoint someone to fill his vacancy until the next election.

that our "regulars" had built to replace their old ones, & now I must tell you of the new home built by "Newcomers", Joann Wilson & Ken Neufers, partners in the "Fly Inn", a bed & breakfast venture. It is situated on the corner of Dwelle Lane where it dead-ends along the airstrip. Dwelle Lane used to run across that airstrip, but several years ago, the road was diverted so that it ran parallel to the airstrip, then made a right angle turn to come out past the end of the airstrip & onto Monagan Road. The new extention is now called Brian Road, after the people who donated the land, but after all these years, we do miss the signpost that says "Dwelle Lane". The house is so very beautiful with cathedral ceilings & sky lights, hugh bathrooms & bedrooms, etc. - but I am sure many of you are aware of this, as Joann is our very popular hair stylist - for both men & women. More power to the both of you, Ken & Joann from all of us!

Saturday, August 20th, marked another of our Annual Kelleys Island Homecoming, sponsored by the Landowners Association. And as usual our "Sun Deck" down by our dock, was the "grandstand" for the parade. Poppy Hodgson, her daughter, Maggie Murray, granddaughter, Jessica, Jessica's girlfriend & our family all had a great time watching the parade go by & the children had a good time picking up the candy thrown out by various floats.

Lee & I took a walk around booths that afternoon & we stopped to talk to Millie Smallbrook, as we had not seen her since Bud's death. And while we were talking, Millie mentioned how much she missed the "Home Town News"! Lee asked if she hadn't heard that a new one had been out for the past 4 months, & she said, "No!" & even as she spoke, Milton

Around the Campfire.....by Mark Bonnell

Well, once again Labor Day Weekend is upon us & summer is over. Wrong!!! Summer isn't over until it's over. September 22 is the first day of Autumn & that still doesn't mean we lock the doors at the State Park. Fall camping is fun. The weather is much more pleasant & the fishing is usually great. The mosquitos have gotten their fill from the summer folk & the crowds have dwindled to a precious few. There will be hot showers at least until the first of November. So plan on trying some fall camping. The summer time fun doesn't end on Labor Day.

The staff of Kelleys Island State Park, for the most part, will be heading back to school soon. We wish them well in their studies. For those of you who haven't stopped by this year I'll introduce them to you. Jeff North is our Park Ranger. Dennis Warga is our Campground Coordinator. Chris Van Auken, Jason Pendleton, Chris Miller & Michelle Schodowski are our Natural Resource Aides & Ted Winterfeld is our Naturalist. They are all here to make sure things operate properly, to get showers cleaned, to get grass mowed, to register campers to answer questions about snakes & bugs, to protect the park visitors & to have some fun. So far they have done a super job on the last entry. I believe that they all plan on returning to work here next season so they should have that fun stuff pretty well mastered.

We look forward to seeing big attendance numbers this fall so come out & go camping. If no one is in the office just fill out a handy self registration card & drop it in the slot. Then you can slip off & enjoy the warm days & the pleasantly cool nights.

Roses have been around for a long time. Scientists have discovered fossil evidence showing that roses existed 30 million years ago!

FISHING..BEEN LOUSY?

One theory is to blame the influx of the Zebra Mussels that have coated western Lake Erie's reefs. They are a freshwater mussel that came on the belly of an ocean freighter from Russia. Most fishing guides from this area have quit for the summer or are traveling to deep-water areas off Lorain & Avon Lake.

The biggest worry for the shoreline cities & industries is the ability of these inch long adult zebra mussels to clog water intake pipes.

Across the lake from Cleveland, near Whatley, Ontario, an automobile that was submerged for 8 months was hauled out of the water this summer. Every part of the car, from the fenders, tires, windshield & seat belts were covered with layers of the mussels.

Cleveland officials are hosting a symposium about this on Dec. 6 at the Convention Center there & worried N.Y. officials are planning a Rochester Conference some time afterwards.

These mussels can attach themselves to the hull of a boat & also survive out of water for a short period of time. One official called the zebra mussel, the most dangerous threat to the fresh water supply in the U.S.

Seaside...

Spring starts this Fall!!! Now is the time to plant your tulips, daffodils, hyacinths, crocus & other spring-blooming bulbs. If you want your yard to be a mass of color next spring, get started now.

Harvest onions before ground freezes.

Mums are a traditional autumn favorite in the perennial garden or as brilliant accents among shrubs. They are beautiful, versatile & long lasting as cut flowers, & mums keep blooming right up to frost.

Fall is an excellent time to make your lawn healthy. If you refuse to fertilize more than once a year, this is the time to do it. Unless of course, you are a fisherman & pick your own night crawlers. They don't like it!

FALL.....by Mary Schock

As along the roads I walk
and take time to see the beauty
of the tree
With it's leaves of yellow,
gold and russet
I ponder on God's
and nature's way...
How can we but stop and say
Fall, how beautiful you are!

A very Special No-Bake Cake

- 1 White Angel Food Cake (buy one on sale & store in freezer)

Cut about 1 inch of the top off with a serrated knife & set aside. Dig out a cavity from remaining cake, leaving about an inch on bottom & both sides. Save these pieces.

- 1 small box strawberry jello
- 1 cup hot water (boiling)
- 1 lb. pk. frozen strawberries (keep frozen)
- Cool Whip or favorite whipped topping

Dissolve jello in hot water & mix well. Add frozen strawberries & stir until they are loose. Break up the cake taken out of cavity, into small chunks & add to jello. Let it thicken somewhat, pack it back into the cavity of the cake, place top back on & smother all over with whipped topping. Store in refrigerator to set well.

Cut with serrated knife to serve.

Beer can be used to replace wine or broths in many recipes. It makes the lightest of souffles & crispiest of batters. It is also used for making pancakes & crepes, for steaming sausages & shellfish & as one of the ingredients of a marinade.

Peanut oil reaches the highest temperature of all cooking oils & is the first choice for Chinese cooking & deep fat frying.

To freeze leftover tomatopaste, drop it by tablespoon onto a cookie sheet lined with wax paper. Flash freeze, remove from wax paper, place in plastic bag & return to freezer to use as needed.

Y Knot.....by Carole Krzynowek

The Rev. Walton would approve of this one:
An apartment house for Golden Agers that provided meals - they have 2 lanes, one for wheelchairs, walkers & etc. & one for pedestrians. They are labeled "cane" & "able".

The Wednesday Night Bridge group has had 2 frequent substitutes this summer - David Phinney & Rob McCullough. Wonder which one is the "Visiting High Lady" when it is time to change tables...?

On a recent visit to the Kekelik residence, Father Bruce Farmer asked Maybelle how she was doing. She replied that it was hard for her to get around & with being on diuretics, made for some interesting situations.

SQUIRREL FEEDERS ARE HERE!

If you are a bird lover, then you'll appreciate squirrel feeders, for when squirrels are fed separately they are less likely to invade the bird feeders. Wildwood Farms Inc. has designed a remarkable line of squirrel feeders that are hand-crafted of natural wood construction. Their "Chair and Table Feeder" has a unique design on which the squirrel can actually sit on the chair and eat the corn off the cob. This is the ultimate in squirrel dining!

It's such a thrill the first time one of those creatures eats the food that has been offered him. Soon they become regulars at meal time. Squirrels are non-migratory, very trusting creatures of habit which makes them an excellent backyard resident. Squirrel feeders teach children about wild life and offer hours of entertainment for all ages.

CORADINE con't

Blatt (Ted Blatt's brother from CALIFORNIA) came up to me to tell me how happy he was to see the new K.I. Newsletter. I asked if I could borrow it a second & handed it over for Millie to see! So now she will be buying her own.

On Sunday, August 13th, we witnessed a very unusual baptism. After our regular church service at Zion, Pastor Walton, Mr. & Mrs. Finnegan & their family journeyed over to Inscription Rock, along with a goodly number of Zion members. After a number of Bible readings & hymns, Pastor & the Finnegan's young boy - Ben - walked down the hill to the lake shore & from there, waded out several feet, where the Pastor baptised him by immersing him into the water; a very impressive ceremony - & - needless to say - a very WET one!

It is time for me to sign off & I'd like to do so by quoting a Chinese proverb:

"If thy neighbor offend thee, give each of his children a drum!"

Till next time,

Coradine

Bed & Breakfasts

The Sand Box..by Dick Kadlec

Kelleys Island Softball team ended league play, coming on strong, finishing with a record of 6 wins & 2 loses. It was good for a second place finish to the Round House. In non-league contests, K.I. had 2 wins over the Marblehead Coast Guard team & a loss to a Sandusky Firemens team.

Highlight of the season was our annual game against the Round House at Put-in-Bay this year on August 14th. Making it possible for 150 of our fans to attend are John & Virginia Neuman who provided the transportation. It was a hard fought game, Round House emerging on top by breaking a tie game going into the last of the ninth inning - final score, 7 to 6.

On the Ferry ride back, we were treated to two full moons, one in the sky & one on the lake, as the ferry was "mooned" by a passing small boat, & seen by all. The moon-er was not positively identified....yet.

Kudo's to the many people that aided in the success of the season. Jackie & Gary Finger, Pattie Johnson, Nick Bianci, Rob Coulon, Jim St. Julian & the members of the baseball team that aided me in getting the ball diamond in shape. Plus all the money donors for equipment & materials used. Hopefully this is a start, as great fan interest was evident by the number of persons attending our games, both home & away.

We'll get 'em next year!!!

"Never mind the towel, Mom. I'll just roll on the rug."

Bits of the Whale's Tale....

Some of the known past Mayors of Kelleys Island are: H. Beatty, Beltz, L. Betzenheimer, M. Brennan, R. Brown, W. Brown, W. Elfers, H. Marchky, R. McCullough, W. Overcashier, E. Ward. They were year round residents. M. McCune, R. Schwartz, T. Starkweather were part time residents who also served as Mayors.

Known Police Chiefs are: A. Derringer, F. Haig, F. Martin, N. McKillips, C. Moore & H. Printz.

Between 1930 to 1960, we had 40 known men & women to hold an aviation license who lived on Kelleys Island. Out of the 40 licensees, 23 owned their own planes.

Dante & Omar Zettler, sons of Eleanor & Toby Zettler of Kelleys Island, recently won scholastic honors at their respective universities.

Dante graduated with a B.S. in Civil Engineering from Ohio State University, SUMMA CUM LAUDE with distinction, one of only 26 OSU graduates to be so honored. He received a Parsons Fellowship for graduate study from the Ralph M. Parsons Laboratory for Water Resources & Hydrodynamics, Department of Civil Engineering, Massachusetts Institute of Technology. Dante hopes to obtain a Masters of Science in Coastal Engineering from MIT and return to work on Lake Erie & watch the sunsets.

Omar was again named to the Dean's List at Bowling Green State University for the Spring semester of his junior year. He plans to transfer to Cleveland State University in the Fall to earn his B.A. in Communications.

WOW! Good job all around - hopes for continued success - you fill us with pride, too!

Shore Thing.....by Carole Krzynowek

Apologies from me to two people:

One - Mark Bonnell because I referred to him as "Ranger" Mark of which he no longer is. He has risen above that level. It's just that I am a Yogi Bear fan from way back & associate that loveable character with a Ranger & Mark is so loveable... (logic of a woman)

Second - Cindra Milke for taking over the "younger" Story Hour group. I gave the credit to Cindy Herndon, who assisted some but basically, Cindra deserves the recognition & much thanks... (some hugs wouldn't hurt)

Chief Provoncha from the Marblehead Coast Guard Station says they responded to 118 cases in & about the Islands in August. There were 5 "med evac" cases from Kelleys Island.

The visiting Perotti-Dutt Duo who were here for The Inn's Victorian Lawn Party found the Island to be comfortable & very relaxing. While touring, they enjoyed their Island Wine Tasting stop.

Lois Giles offered piano & voice lessons on the Island this summer. Kelly Price (daughter of Staci DeBoard Price), Katie & Sarah (daughters of Vicky & Paul Finnegan) all made their debuts on the piano playing both solos & duets at the Victorian Lawn Party.

Quality Education's Pig Roast was regrettably cancelled for this year.

A Mass will be held on Sunday, Noember 12, at St. Michael's Catholic Church. It celebrates the conclusion of the Synod process. There will be no Saturday Masses throughout the Toledo Diocese that weekend, & the liturgy is to be special & meaningful. A catered reception will follow but reservations will be necessary.

Kim & Rob Watkins wish to express much THANKS to their summer help: Sis Bradburn, Laurie James, Nancy Donly & fudge gal, Lori Deel!

Dear Readers,

My husband, Wally, & myself have had a close friendship with two special guys on this Island. Ironically, they both passed away within a short time of each other, Hank Knapp & Jim Terwilliger.

Forever and Ever

*Do not stand at his grave and weep,
He is not there. He does not sleep.
He is a thousand winds that blow.
He is the diamond glints on snow.
He is the sunlight on ripened grain.
He is the gentle autumn's rain.
When you awaken in the morning's hush,
He is the swift uplifting rush
Of quiet birds in circled flight.
He is the soft stars that shine at night.
Do not stand at his grave and cry,
He is not there, For with the Lord
He is everywhere.*

We miss them with love...
At dockside & holding,

Carole

Parsons table with 2" sq. legs & apron so 1" diameter washers will fit exactly. Coat of brown enamel provides warm luster behind metallic gleam. Lay table on side & glue washers to apron first, using iron glue or Duco cement. Continue gluing washers down legs,

letting each side set thoroughly so gravity won't cause a downward slide. Turn table & continue covering top last.
